Presented by:

Diana R. Mager, DNP, RN-BC

Mary Narayan, MSN, RN, HHCNS-BC

This 2-hour webinar will address medication management issues common to home health nurses in the United States and globally. It will conclude with a brief discussion about how the *International Guidelines for Home Health Nursing* (2017) can be used to stimulate better medication practices. Webinar topics include:

- Medication management issues and related strategies including reconciliation, polypharmacy and adverse drug events
- The World Health Organization's "High 5s" medication management initiative
- Global exemplars of medication management solutions and successes
- Updates to the International Guidelines for Home Health Nurses, including those related to medication management
- Question and answer session
- IHCNO news

Please register in advance at: www.fairfield.edu/issuesinmedmg
to receive instructions on how to access the webinar

The webinar will be recorded: Access after October 12 at www.ihcno.org

Certificate of participation will be provided upon completion of the program evaluation form.
